Summary

Data Analyst with a strong foundation in SQL, Python, Excel, and Power BI. Skilled in cleaning, analyzing, and visualizing data to generate insights and support data-driven decision-making. Interested in collaborating on meaningful analytical work in fast-paced environments.

Skills

Programming & Querying: SQL, Python (NumPy, Pandas, Matplotlib, Seaborn)

Data Visualization Tools: Power BI (DAX, Measures, Interactive Dashboards)

Analytical Abilities: Data Cleaning, Data Modeling, Data Transformation, KPI Analysis, Descriptive Statistics, Data Interpretation, and Exploratory Data Analysis (EDA), Statistical Analysis

Soft Skills: Communication, Analytical Thinking, Problem Solving, Business Understanding, Decision-Making Ability, Logical Thinking, Time Management

Projects

Vendor Performance Analysis | *Python, SQL*

November 2025

- Created a vendor-level analytical dataset (10,692 records) by integrating multiple raw business tables from PostgreSQL using SQL queries in Jupyter Notebook.
- Performed data cleaning and feature engineering in Python to calculate key metrics such as Total Sales, Gross Profit, Profit Margin, and Total Purchase.
- Conducted exploratory data analysis (EDA) using Python visualizations to identify trends, outliers, and vendor performance patterns.
- Applied statistical analysis (confidence intervals and t-test) on vendor profit margins to support data-driven recommendations.

Bank Loan Analysis | *SQL, Power BI*

October 2025

- Created multi-pages Power BI dashboards (Summary, Overview, Details) using SQL-driven measures to monitor 38,577 loan applications, total funded amount, repayments, average interest rate, DTI, and month-over-month performance.
- Segmented loans into Good vs Bad categories, identifying 86.2% good loans vs 13.8% bad loans, and examined disbursed vs received amounts to evaluate portfolio risk and repayment quality.
- Executed state-level, term-level, employment-length, home-ownership-level, and loan-purpose analysis to determine patterns that drive the choice of applicant segments for funding loans and repayment behavior.
- Designed a granular drill-down report capturing each borrower's loan status, grade, purpose, issued date, financed amount, received amount, interest rate, and DTI, enabling deeper operational and risk insights.

Coffee Shop Analysis | *SQL, Power BI*

September 2025

- Analyzed 149,119 coffee shop transactions** using MySQL to identify monthly revenue, orders, and amount for multiple store locations.
- Developed KPI dashboards tracking \$119K in sales, 25K+ orders, 36K+ units sold, including mom trends, weekday/weekend performance, hourly patterns, and daily sales benchmarks.
- Executed store-level, category-level, and product-level analysis using SQL and DAX, identifying top-performing locations, high-revenue categories, and best selling-products through ranked insights.
- Reported a 29% mom increase in sales for march, driven by specific high-performing products.

Awards & Certifications

- **Career Essentials in Data Analysis – Microsoft & LinkedIn (2025):** (*View Certificate*)
- **Data Analytics Job Simulation – Deloitte (2025):** (*View Certificate*)
- **Databases and SQL – IBM (2025):** (*View Certificate*)

Education

B.Tech. Computer Science and Engineering

Satyasai Engineering College, Balasore

Graduated: 2025

CGPA: 8.1 / 10
